

Wilkore	POL 00.2
Environmental Policy Statement	

ENVIRONMENTAL POLICY

Throughout WILKORE we are committed to ensuring that all our operations are conducted in a manner to protect and preserve the environment.

We believe that all incidents are preventable and we are compelled to achieve the highest environmental performance standards. The objective of this policy is that through pro-active assessment, management and control of risks we will secure preservation of the environment.

We will continually improve our performance through:

Personal Responsibility

As individuals we are responsible for the preservation of the environment as we conduct our operations and for upholding the WILKORE environmental culture.

Accountability

At all levels in our organisation we are accountable for the results and achievements of the teams we lead and the people we manage. As line managers we are accountable for providing sufficient resources to ensure the success of our environmental program.

Risk Management

Managing and controlling risks will enable WILKORE to operate efficiently and in an environmentally conscious manner. Through the pro-active identification, assessment and management of environmental issues, the probability of environmental damage arising from our operations will be minimised.

Learning Culture

Personal and organisational growth shall be achieved through education, training and shared experience. We encourage all employees to provide ideas and contributions.

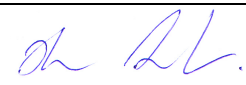

One Consistent Approach

We will maintain a consistent approach to conservation of resources and the environment. We will comply with applicable Laws, Regulations, Standards and Guidelines throughout all our operations. Using the approach set out in AS/NZS 14001: Environmental Management Systems, Wilkore, will manage the organisation in an environmentally sound manner.

We encourage your personal commitment to this policy and your respect for the environment.
