

In May 2011 Wilkore completed construction of a new office, warehouse and showroom complex for Linde Material Handling Australia. The complex has been built to house the assembly, service and maintenance of Linde's forklifts. The facility includes 1,000m² of office and showroom space and 3,500m² of warehouse and assembly space.

Linde requested that the facility be based on their recently completed facility in Queensland. Wilkore adapted this model to suit Linde's site at Caribbean Business Park which included a second floor to the facility as well as an extra 1,000m² of space.
